					REPORT NO.	<u> </u>	25X1		
25X1	OF THE UNITED S AND 794, OF THE LATION OF ITS O	ONTAINS INFORMATION AFFECTING T TATES, WITHIN THE MEANING OF TIT U.S. CODE, AS AMENDED. ITS TR ONTENTS TO OR RECEIPT BY AN UMA AW. THE REPRODUCTION OF THIS	LE 18, SECTIONS 793 ANSMISSION OR REVE- UTNORIZED PERSON IS	THIS IS UNEVALUATED INFORMATION					
	1.	The Dunapentele ((Sztalinváros) heigh O, Serial 5,262, She	t point appears	on a map enti	tled			

3. Both stations are newly erected and equipped with brand-new radar, produced by the Standard factory at Budapest.

the parabolic reflectors revolved at the approximate rate of 20 rpm., the diameter was between 240 and 250 cm., and c. there was "a wedge at the focal point" of each reflector.

- 5. The stations described are both manned exclusively by Hungarian military personnel, about 30 men each.
- 6. Two new radar stations had been identified at the following locations:
 - 3 km. west of the village of Magyarszombatfa (E79)
 - b. 2 km. southeast of the village of Lenti (E98)

Descriptions of their size, equipment, personnel, etc. tally with those given of the two posts reported above.

Comment: The previous report on the same subject refers to Mt. Meles near Sokord, south of Komarom. This is incorrect, the Sokoro region begins about 7 miles south of Gyor (Y44). Note that Mt. Meles is spelled Mt. Medes in the present report. Neither spelling appears on available maps or in the Gazetteer.
